This Jobs Plan is very Simple. You eliminate the waste and fraud by supplying the monies directly to the Unemployment Commission Program(s). With less than \$30billion Dollars you can hire 1million for TWO years. It simple The Bill Will fund the hiring of anyone on unemployment (Time on unemployment shouldn't be a requirement). these will be salaries for an Average of \$40,000 and A max Salary of \$60K. If you had Positions listed for \$25K that's 3 employes for a total of \$75K. If you listed a \$60K job, you would not be eligible.

The Gov will pay the employee salary/Position for alternating quarters (3) Months and The Company s require to continue to hire and pay the employe Salary for the next alternating quarters (3) Months. If the employee is replaced, quit or is released, The Company must fill that position with another employee off the Unemployment List. Any Company Failing to Complete the TWO Year plan must pay the Government back 200%.

The 1 employee per 100 Jobs filled, will be added to the Unemployment Staff to verify continuous employment. These employess are not used for the hiring process, but to follow the position and report Status, also to uncover any Fraud. Verifiers shouldn't have a problem verifying 10-15+ Cases per day. *This should give them a quartley Verify per employee*. I'm Sure there will be a tax Saving or Tax Revenue earned off this but didn't know how to compute the SS, Medicare, Federal, State Taxes. Many will NOT have any Realized Fed or State Taxes. By changing the Average Salary the numbers will automatically Update. The Amount of unemployment Varies state to State and the Maxium amount of weeks also Varies if eligible for the Extension. Most are Guarenteed a mimimun of 6months.
